

POLY CHEM

COMPANY PROFILE

The Polychem Group takes pride in maximizing the success of your fiberglass and composite projects, as well as also other industries, where similar products are needed. It's not just about products; it's about offering superior solutions and comprehensive product information.

Commitment is not just a word; it's a way of life at the Polychem Group. The company is dedicated to continuous improvement, ensuring that its product range, physical presence, service, and delivery consistently surpass expectations.

With an unwavering commitment to pioneering solutions and embracing next-generation technologies, the Polychem Group transforms uncharted market needs into growth opportunities for the industry and its valued customers. The company's mantra revolves around discovering those hidden needs and turning them into avenues of success, especially for you!

For us at Polychem Far East it is the ambitious goal to perform same standards within a short period of time. Our product range will grow with the demand from our customers. This process may take some time, but the long-term relationship the Polychem Group has built-up with their suppliers, ensures highest quality with competitive prices.

Polychem Middle East is Expanding to the East!!

Since 1998, Polychem Middle East, operating from the Emirates of Ajman, United Arab Emirates, has served the Composites Industry in the Entire Middle East, Africa, Sri Lanka and India with Composites Reinforcements, Tools, Pigment Paste, our solvent free cleaner Polyclean, Polyfoam and Ancillaries. Focusing on solutions and next-generation technologies, we offer market-driven solutions to our customers.

It's time to move onwards to other fast-growing markets and therefore the decision was made to open their own company Polychem Far East Co. LTD. in Asia, namely Thailand! The office and warehouse facilities are ideally located next to Bangkok (close to highway Rama 2) in the city Samut Sakhon, from where we serve the Thai market, but also the neighboring countries.

Bridging Expertise: Polychem Enters Electronics

Polychem, long known for industrial materials and composite solutions, is strategically expanding into electronics and telecom infrastructure. This move reflects our core strength not just trading, but engineering integrated systems with top-tier components, technologies, and partners.

Leading this initiative is Daniel Koning, a 25-year veteran in Telecom and Electronic Infrastructure. Under his guidance, Polychem Far East will serve the fast-growing Asia-Pacific region with high-quality, reliable, and timely infrastructure solutions.

This is not just diversification it's a natural evolution of our system-centric philosophy. We are integrators. We bring together the best.
